## REOPEN YOUR BUSINESS AND WORKSPACES WHILE KEEPING EMPLOYEES, GUESTS AND CUSTOMERS SAFE

This no-contact, fever inspection kiosk is armed with advanced Analytics capabilities to make real-time temperature inspection easy, fast, and remarkably accurate. Its Artificial Intelligence [AI] layer acts as a facial recognition tool that can be customized to remember employees and visitors. Paired with a digital screen, it displays key confidence measures that consumers find reassuring before they enter. It can serve as a standard digital signage kit to display key content during seasonal downtimes.

## A TOTAL SOLUTION YOU CAN TAILOR TO YOUR BUSINESS

### Interactive Question & Answer Checklist

- You provide the questions
- You decide how recent the screening step must be

### On-Premise Station Leverages Voice AI

- Screen with speaker and microphone, asks and listens for answers
- Touchless, fully automated (touch option supported)

### Mobile Option

- Allow individuals to complete, at their convenience, a self-declaration form before arriving

### Stand Alone, Thermal Camera-based Station

- Instantly determines visitors or employees temperature

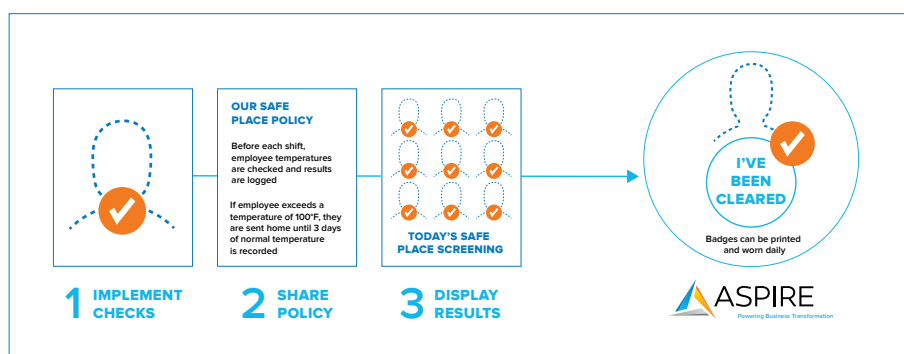

### Physical Station Leverages Facial Recognition

- Touchless, fully-automated, with known individual tracking

### Most configurable solution in market today

- Full control over what is displayed - lights, sounds, and text
- Can be configured to have no visual response (must scan Results QR Code for status)

**Touchless and fully-automated, use digital signage to inform and direct**

## ASPIRE RAISES THE BAR FOR AUTOMATED NO-TOUCH SCREENING

### Safety is Now Simple

- No-contact remote forehead temperature inspection
- Multi-point temperature: Stop, Scan, View and Log instantly, with output +/- 1 second
- Reliable accuracy +/- 0.5°C | +/- 0.9°F
- Works by facial detection, with or without mask; with or without photos through a facial recognition layer
- If individual exceeds temperature limits, notification can happen – and delivered via email or SMS
- Works immediately after the device is powered on – no calibration needed
- Options:
  - Print label to provide physical proof of having cleared the necessary station(s)
  - Use Safe Space App QR Code or Pass

### The AI Engine is the Difference

- Connect and synchronize multiple points of entry – aggregated to a single, unified dashboard
- Customizable to conform to Safe Space, HR, legal, privacy or other corporate compliance requirements
- AI-enabled with rules engine so it learns patterns, and can trigger smart alerts on anomalies or other indicators
- Dashboard provides daily reports, trending, and alerts based on set KPIs – and can be accessed remotely
